Financial Instruments and Risk Management

The following is the accounting policy for financial assets under IFRS 9:

Financial assets

The Company classifies its financial assets in the following categories: at fair value through profit and loss ("FVTPL"), at fair value through other comprehensive income ("FVTOCI") or at amortized cost. The determination of the classification of financial assets is made at initial recognition. Equity instruments that are held for trading (including all equity derivative instruments) are classified as FVTPL; for other equity instruments, on the day of acquisition the Company can make an irrevocable election (on an instrument-by-instrument basis) to designate them as at FVTOCI.

The Company's accounting policy for each of the categories is as follows:

Financial assets at FVTPL: Financial assets carried at FVTPL are initially recorded at fair value and transaction costs are expensed in profit or loss. Realized and unrealized gains and losses arising from changes in the fair value of the financial assets held at FVTPL are included in profit or loss.

Financial assets at FVTOCI: Investments in equity instruments at FVTOCI are initially recognized at fair value plus transaction costs. Subsequently they are measured at fair value, with gains and losses arising from changes in fair value recognized in other comprehensive (loss) income in which they arise.

Financial assets at amortized cost: A financial asset is measured at amortized cost if the objective of the business model is to hold the financial asset for the collection of contractual cash flows, and the asset's contractual cash flows are comprised solely of payments of principal and interest. They are classified as current assets or non-current assets based on their maturity date and are initially recognized at fair value and subsequently carried at amortized cost less any impairment.

Impairment of financial assets at amortized cost: The Company recognizes a loss allowance for expected credit losses on financial assets that are measured at amortized cost.

The Company has classified its financial instruments as follows:

- Cash: FVTPL
- Trade payable and accrued liabilities: Amortized cost

The Company classifies its financial instruments measured at fair value at one of three levels according to the relative reliability of the inputs used to estimate the fair value:

- Level 1 – quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2 – inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- Level 3 – inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The Company's cash is measured as level 1 input. The carrying value of accounts payable and accrued liabilities approximates the fair value due to its short-term nature.

The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework.

Overview

The Company's financial instruments consist of cash and accounts payable and accrued liabilities. The fair value of these financial instruments approximates their carrying value due to short term nature.

Credit Risk

Credit Risk is the risk of potential loss to the Company if the counterparty to a financial instrument fails to meet its contractual obligations. The Company's cash is held with reputable institutions in Canada.

Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at March 31, 2021, the Company had a cash balance of \$663,753 to pay liabilities of \$99,979.

Market Risks

The Company will be subject to normal market risks including fluctuations in foreign exchange rates and interest rates. While the Company manages its operations in order to minimize exposure to these risks, the Company has not entered into any derivatives or contracts to hedge or otherwise mitigate this exposure. For the period ended March 31, 2021, the Company held no financial instruments subject to significant foreign exchange or interest rate risks.

Capital Management

The Company's capital consists of share capital. The Company's objective for managing capital is to maintain sufficient capital to identify, evaluate and complete a Qualifying Transaction. The Company sets the amount of capital in relation to risk and manages the capital structure and makes adjustments to it in light of changes to economic conditions and the risk characteristics of the underlying assets.

The Company's objectives when managing capital are:

- to maintain a flexible capital structure, which optimizes the cost of capital at acceptable risk; and
- to maintain investor, creditor and market confidence in order to sustain the future development of the business.

The Company is not subject to any externally or internally imposed capital requirements at year end, except as discussed below.

Until the completion of a Qualifying Transaction, the gross proceeds realized from the sale of all securities may only be used to identify and evaluate assets or businesses for, and obtain shareholders approval for, a proposed Qualifying Transaction, with the exception that no more than the lesser of 30% of the gross proceeds from the sale of securities issued by a CPC and \$210,000 may be used to cover prescribed costs of issuing securities and administrative and general expenses.

Upon completion of the Transaction, INX will become a wholly-owned subsidiary of the Company, and the combined entity (the "Resulting Issuer") will continue the business of INX.

INX expects to complete an equity financing (the "Concurrent Financing"), by way of a private placement of up to 32,000,000 subscription receipts (each, a "Subscription Receipt") at \$1.25 per Subscription Receipt for aggregate gross proceeds of up to \$40,000,000. On Closing, the Resulting Issuer expects to enter into five year advisory agreements (each, an “Advisory Agreement”) with James Decker and Johnny Ciampi (each, an “Advisor”). Each Advisory Agreement will provide for the issuance of 1,000,000 immediately vesting options to purchase shares of the Resulting Issuer (each, an “Advisor Option”) under the Resulting Issuer’s stock option plan to the applicable Advisor, with 500,000 Advisor Options being exercisable at a price of \$1.25 per share and 500,000 Advisor Options being exercisable at a price of \$2.50 per share, and all Advisor Options expiring on the date that is five years from the Closing.

Critical Judgement and Estimates

The details of the Company's accounting policies are presented in Note 2 of the financial statements ended December 31, 2021. The accounting policies applied in preparation of the financial statements are consistent with those applied and disclosed in the Company's audited financial statements for the year ended December 31, 2020.

Management's responsibility for the financial statements

Information provided in this report, including the financial statements, is the responsibility of management. In the preparation of the statements, estimates are sometimes necessary to make a determination of future value for certain assets or liabilities. Management believes such estimates have been based on careful judgments and have been properly reflected in the accompanying financial statements. Management maintains a system of internal controls to provide reasonable assurances that the Company's assets are safeguarded and to facilitate the preparation of relevant and timely information.

Risks and Uncertainties

The Company has neither a history of earnings nor has it paid any dividends and it is unlikely to generate earnings or pay dividends in the immediate or foreseeable future. The Company was only recently incorporated and does not own any ongoing business operations and has no assets other than cash. The Company has not identified a proposed Qualifying Transaction and has not entered into an Agreement in Principle. There is no assurance that the Company will identify and successfully negotiate the acquisition of any potential corporations, properties, assets or businesses, or any interests therein, nor that any such opportunities or businesses acquired will be profitable. Moreover, additional funds may be required to successfully complete an acquisition, and the Company may not be able to obtain such financing or may not be able to raise sufficient funds to take a meaningful position in a potential target. If the acquisition is financed by the issuance of shares from the Company's treasury, control of the Company may change and shareholders may suffer additional dilution. The directors and the officers of the Company will only be devoting a portion of their time to the affairs of the Company. Potential conflicts of interest may result from the ordinary course of business of the Company and of the directors and the officers of the Company.

The TSX-V may suspend from trading or delist the common shares where the Company has failed to complete a Qualifying Transaction within 24 months of the date of listing. The Company may be issued an interim cease trade order if the common shares are suspended delisted from trading on the TSX-V. In addition, delisting of the common shares will result in the cancellation of all of the currently issued and outstanding common shares held by insiders that are discount seed shares within the meaning of the CPC Policy.

COVID-19

In March 2020 the World Health Organization declared coronavirus COVID-19 a global pandemic. This contagious disease outbreak, which has continued to spread, and any related adverse public health developments, has adversely affected workforces, economies, and financial markets globally, potentially leading to an economic downturn. While COVID-19 has had minimal impact on the Company's operations to date, due to the Company's small workforce and ability to implement measures such as working remotely and implementing appropriate social distancing and cleaning regimes in its workplaces, the pandemic has caused significant uncertainty and turbulence in the capital markets. It is not possible for the Company to predict the duration or magnitude of the adverse results of the outbreak and its effects on the Company's business or its ability to raise funds.

Outlook

The Company's current objectives are to identify and evaluate assets or a business to acquire which will serve as its Qualifying Transaction subject to shareholder and regulatory approval.

Corporate Governance

The Company's Board of Directors follows recommended corporate governance guidelines for public companies to ensure transparency and accountability to shareholders. The Audit Committee of the Company fulfills its role of ensuring the integrity of the reported information through its review of the interim and audited annual financial statements prior to their submission to the Board of Directors for approval. The Audit Committee, comprised of three directors, all of whom are independent, meets with management of the Company on a quarterly basis to review the financial statements, including the MD&A, and to discuss other financial, operating and internal control matters as required.
